

IN AN EMERGENCY, CAN THEY HEAR YOU?

Are audio announcements missing from your facility's mass notification plan?

- Voice announcements provide clear, real-time instructions for situations that may be rapidly evolving.
- All areas on a campus can be covered by audio announcements.
- Announcements can be directed to specific zones on a campus allowing control over dissemination of information.
- Voice announcements can reach areas where cell phones and networks may not.
- Voice announcements are exceptionally flexible; initiated from many different locations, by people who speak different languages.
- Students, faculty, and staff don't need to be online to receive important announcements.
- Easily integrated with other mass notification systems.

Let Bogen's 75 years of public address, paging, and educational communications systems experience help you to secure your campus environment.

- Bogen can supply any combination of high-power voice announcements, hands-free 2-way communications, telephones or call buttons for up to 16,000 locations on a campus.
- Bogen provides speakers to cover all campus environments—indoors, outdoors, to a single classroom or over vast areas.
- Bogen provides systems for outgoing wide-area public address or hands-free, 2-way communication to a specific area.
- Bogen can enhance communications capability by providing call buttons that signal to security locations when assistance is needed and positively identify the origination point.
- Bogen systems provide selectivity and identification of locations down to the specific building, floor, classroom, or individual dorm room.
- Bogen systems are deployable in many different ways to fit the needs of the facility. Choose from copper hard-wired system for ultra reliability or network-enabled systems for quick installation and flexibility.
