Antenna Connections

Anyone who has installed a tuner inside an industrial building knows that radio signals don't penetrate too far into these steel-laced structures. Because the **DST1** is designed for industrial installations, it contains inputs for both external 300-ohm (twin line) and 75-ohm (coaxial) antenna feeds. The 75-ohm input uses an "f" connector and can receive feeds from antenna distribution systems or cable systems.

Whether sitting on a shelf or mounted in a rack, the **DST1** is a great choice for an industrial-grade tuner.

Power Requirements:	120V AC nominal @ 60Hz
Dimensions:	16-7/8" W x 1-3/4" H x 10" D
Product Weight:	5 lb.

Paging Input Details

The DRZ35 has a full-featured microphone paging input. The microphone input is a low-impedance balanced input that works with dynamic or condenser microphones. Whenever a page is made, the AUX or Tuner feed is muted via a VOX detector. When the page is completed, the other source smoothly fades back in.

By using a WMT1A matching transformer, the MIC input can be connected to the paging port of a telephone system.

Speaker Zones

Built into the DRZ35 is a convenient 4-zone selector switch group. These push-on/push-off switches allow you to control how paging is distributed throughout a facility. Simply turn on and off groups of speakers as needs change.

Power Requirements:	120V AC @ 60Hz
Dimensions:	17" W x 5-1/4" H x 13-5/8" D
Product Weight:	20 lb.
