

Clear instruction meets campus safety

Send a discreet emergency alert

Send a mobile, discreet
alert in case of an
emergency

Make two-way calls for support

Initiate a two-way
SIP call to request
assistance

Voice clarity for instruction

Provide clear and
engaging instruction
to all students in their
classroom

With continued legislation and focus on safety and security in schools, effective school-wide communication is no longer a nice to have – it is an essential part of any safety and security plan.

The Lightspeed Cascadia instructional audio platform distributes voice and sound evenly throughout the classroom and integrates with existing life-safety and communication systems – so teachers provide clear, effective instruction while staying connected to support when needed.

Clear audio with critical connections

Lightspeed and Bogen Communications partnered to engineer a solution that integrates key features of both platforms to bring teachers to the center of the school communication system, including mobile discreet alerts, alert location and building-wide coverage.
