INTRODUCING

ALA-C1

LINE ARRAY LOUDSPEAKER

The **Apogee ALA-C1 Line Array Loudspeaker** is a high-fidelity, 70V/8-ohm, passive, 2-way fixed column, all-weather, indoor/outdoor loudspeaker designed for small-to medium-sized venues, such as school cafeterias and gymnasiums, civic auditoriums, community theaters, lecture halls, and houses of worship.

The ALA-C1's innovative design offers extremely broad horizontal dispersion (140-degrees) and focused vertical dispersion (25-degrees) – which is ideal for uniform side-to-side coverage, while minimizing ceiling and floor reflections that could degrade intelligibility. The ALA-C's enclosure is available in both a black or white finish.
