

**BOGEN**

# E7000 SERIES

## RELEASE 6.0 NOW AVAILABLE

### Bogen E7000 Series

#### IP-Based Communications System for safer, better managed schools

The **E7000 Series** is a software-based state-of-the-art IP-based paging and intercom solution that leverages the latest digital, mobile and software technologies to address today's educational environments, security challenges and mobile lifestyles.

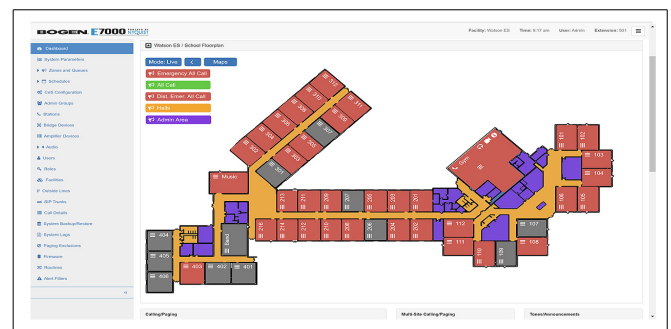

The **Nyquist E7000 ver. 6.0 Software Release** represents a significant enrichment of Bogen's award-winning solution and adds **over 70 new features** and enhancements to an already robust platform with improved capabilities in communication, safety, and security.

#### RELEASE 6.0 HIGHLIGHTS

- **District-Wide Schedule Management** from a single interface allows administrators to remotely control what bell schedule is running at any facility throughout their network
- **Multi-facility Paging/Announcements** enables live or prerecorded communications across an entire enterprise for emergency or standard messaging
- **Automatic Failover Capability** (Server) reduces the loss-of-communications risk due to a single point-of-failure
- **Routines/Routines API Enhancements** includes the addition of many new event triggers and actions, in addition to enhanced security via encryption, SSL certificates and strong API keys
- **Display Graphic Images on GA10PV Displays** adds the ability to combine graphic images with text to improve the system's visual messaging capability
- **Embedded DHCP Server Option** allows customers to install a dedicated, independent Nyquist communications network, in addition to simplifying the discovery and setup of both Nyquist and supported third-party devices
- **Support for Debian 10 OS** keeps the system's OS up-to-date with the latest performance enhancements and security updates

*Clock/Messaging Display capability improves school communications*

*Emergency Classroom Check-In feature enhances campus security*
