Bogen introduces the next generation in self-amplified (24V) paging equipment. Only Bogen offers high-efficiency horn speakers that use digital switching amplifiers and constant dispersion horn technology; single- and multi-zone telephone paging interfaces that provide a new level of features and flexibility with programmable AUX relay contacts and installer programmable dialing codes; and an extensive line of 24V switching power supplies with secure mounting holsters and pluggable screw terminal connectors on models above 1 amp.

To locate Bogen’s Self-Amplified (24V) Paging Products, simply look for the upward-pointing GREEN triangles and the downward-pointing RED triangles. The numbers inside the triangles indicate "Current Units", which determine how much power that product provides to or consumes from the system.

Other products such as telephone interfaces, buffered level controls and 24V power supplies that are well suited for use in self-amplified paging systems carry these same icons for easy identification. Suitable products that neither provide nor consume power are shown with the neutral GRAY icon with a zero inside it.

For more information on understanding Current Units for your system, see pages 68-69.

---

**Getting Started**

1. Select Self-Amplified Speaker Type (Use this chart)
2. Select a Telephone Interface (pages 31-33)
3. Select Power Supplies (page 30)
