E7000 SERIES

RELEASE 8.0 NOW AVAILABLE

Bogen E7000 Series
IP-Based Communications System for safer, better managed schools

The **E7000 Series** is a software-based state-of-the-art IP-based paging and intercom solution that leverages the latest digital, mobile and software technologies to address today's educational environments, security challenges and mobile lifestyles.

The **Nyquist E7000 ver. 8.0 Software Release** represents a significant enrichment of Bogen's award-winning solution and adds **over 40 new features** and enhancements to an already robust platform with improved capabilities in communication, safety, and security.
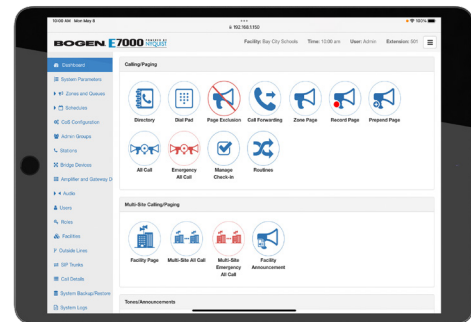

This new software release emphasizes ease of use through automation, and enhanced performance through built-in redundancy. Easy system configuration, coupled with an intuitive UI, allows customers to quickly deploy features that are important to their schools' needs.

RELEASE 8.0 HIGHLIGHTS

- **Microsoft Active Directory and LDAP Support** - Allows Nyquist users' login credentials to be centrally managed by IT – just like they do for all their other enterprise applications

- **Multi-facility Announcement Routine Action** - Users can select one, multiple, or all facilities in which to play an announcement

- **NQ-ZPMS Zone Paging Mic Station support** – Hands-free paging via attached, flexible gooseneck microphone, accompanied by 112-programmable softkey zone selection on large 10.1-inch touchscreen display

- **Copy Schedules** - Easily create new bell/event schedules from\ existing ones

- **iOS and iPadOS support** - Allows full system operation via the Nyquist UI Dashboard for bell/event scheduling, emergency paging, all call paging, zone paging, audio distribution, along with all the other powerful Dashboard capabilities

- **Sound Masking S/W Feature option** – Enable sound masking in school libraries, study halls, or faculty office spaces for more private conversations, and less distraction from surrounding conversations
