# E7000 SERIES

## RELEASE 10.0 NOW AVAILABLE

### Bogen E7000 Series

#### IP-Based Communications System for safer, better managed schools

The **E7000 Series** is a software-based state-of-the-art IP-based paging and intercom solution that leverages the latest digital, mobile and software technologies to address today's educational environments, security challenges and mobile lifestyles.

The **Nyquist E7000 ver. 10.0 Software Release** represents a significant enrichment of Bogen's award-winning solution and adds **over 70 new features** and enhancements to an already robust platform with improved capabilities in communication, safety, and security.

This release enhances system security and integration with a Debian 12 OS upgrade, encrypted audio, and expanded API support. Improved alert handling, flexible time sync options, and customizable emergency audio ensure a smarter, more responsive system.

#### RELEASE 10.0 HIGHLIGHTS

- **Debian 12** - In our ongoing effort to keep Nyquist as secure as possible we will be upgrading the Nyquist OS to Debian 12 with the 10.0 software. This allows our security-conscious customers to keep the System Controller OS up to date with security patches.
- **Secure SIP TLS and SRTP** - securing the audio between all Nyquist Appliances and most third-party hardware
- **NWS Alerts** – this new interface provides a simplified mechanism for creating, configuring, and manipulating Routines to handle NWS alerts. This also provides more accurate location information with the introduction of latitude and longitude configuration.
- **API v2** – this evolution API adds support for inbound POSTs with JSON files from 3rd party systems. This allows images and audio to be passed to Nyquist
- **Multiple NTP servers** - allow customers to configure use of more than one NTP server
